Foreword

Administered on an annual or biennial basis since 1990, the Navy-wide Personnel Survey (NPS), is a major product of the Navy Personnel Survey System (NPSS) at the Navy Personnel Research, Studies, and Technology (NPRST) Division of the Bureau of Naval Personnel. The NPS focuses on such topics as Sailor demographics, training/education needs, leadership satisfaction, financial status, detailing, assignment, PERSTEMPO (i.e., work-related time away from home), job characteristics, job satisfaction, organizational commitment, morale, career development, career intentions, gender integration, availability of resources, and overall satisfaction with Navy life. This information is of value to senior leadership and program managers in evaluation of Navy quality of service, and in the assessment of current Navy personnel policies and programs.

The 2003¹ NPS was conducted under the sponsorship of the Chief of Naval Personnel (N-1) within the NPSS funding line. Data collection concluded in May 2003, and the results of the survey were briefed to the Commander, Navy Personnel Command and staff in March 2004 and sent to the Chief of Naval Personnel and his staff in June 2004.

This report contains statistical tables of survey responses from officers and enlisted Sailors by paygrade, race, and gender. Further documentation of the 2003 NPS findings can be found in additional reports, which provides detailed summaries of the survey content, administration, and results (Whittam, Janega, & Olmsted, 2005; Janega, Uriell, Whittam, 2005). Any questions regarding this report should be directed to the NPS Project Director, Dr. Kimberly Whittam, kimberly.whittam@navy.mil, (901) 874-2321 or DSN 882-2321.

DAVID L. ALDERTON, Ph.D.
Director

¹ The Navy-wide Personnel Survey was administered between December 2002 and May 2003. Since data collection was complete in 2003 and analyses were conducted in 2003, the survey is referred to as the 2003 Navy-wide Personnel Survey.

Summary

The 2003 Navy-wide Personnel Survey (NPS) was conducted between December 2002 and May 2003. The NPS was administered to a random sample of 13,960 active-duty officers and enlisted Sailors on paper forms (66%) and via the Internet (33%). Overall, the adjusted response rate of the survey was 28 percent. The NPS is an omnibus survey that focuses on such topic areas as Sailor demographics, training/education needs, leadership satisfaction, financial status, detailing, assignment, PERSTEMPO (i.e., time away from home), job characteristics, job satisfaction, career development, career intentions, availability of resources, morale, gender integration, and overall satisfaction with Navy life. Results were statistically weighted to allow for generalization of the survey results to the entire Navy population.

Introduction

Current Navy-wide personnel survey efforts such as the Navy-wide Personnel Survey (NPS) and the Navy Quality of Life Survey (NQOL) focus on assessing issues related to Quality of Service (Quality of Work and Quality of Life) to provide a systematic method of collecting data on the attitudes and opinions of Sailors throughout the Fleet. These surveys augment other sources of corporate data maintained by the Navy (i.e., Enlisted and Officer Master Files) enabling Navy leadership to set priorities and target policy initiatives to the needs and concerns of Sailors based on an accurate data-based portrait of the Fleet. Together, these sources provide information that can assist senior Navy leadership in recruiting, training, developing, and retaining the highest-quality Sailors as part the Sea Warrior transformation.

Background and Purpose

In 1989, Navy senior leadership created the Navy Personnel Survey System (NPSS) as a way of collecting accurate information regarding the attitudes, opinions, and needs of Sailors. The NPSS was developed with three primary objectives: (1) to conduct an annual omnibus (i.e., general issues) Navy-wide personnel survey, (2) to coordinate all personnel surveys administered to a Navy-wide population, and (3) to conduct research focused on improving the quality and efficiency of Navy personnel surveys.

The first of these objectives was realized through the development and administration of the Navy-wide Personnel Survey (NPS). The NPS began in 1990 as the first survey product of the NPSS. The purpose of the NPS was to measure the attitudes and opinions of Sailors regarding a variety of issues important to Navy leadership. The NPS is administered to a representative cross-section of the Navy and creates a data-based “portrait” of Sailors through the collection and analysis of scientifically-gathered survey data and demographic information. The NPS also provides a vehicle for Navy leadership to assess major policies, programs, and current issues affecting Sailors’ satisfaction with the Navy. In 2000, the NPS was further refined to focus specifically on the most relevant personnel issues to Navy leadership including topics such as job satisfaction, leadership, morale, career development and intentions, performance evaluation, organizational commitment, and detailing (i.e., distribution of Navy personnel).

The 2003 NPS continues the work of the 2000 NPS and prior surveys in assessing core issues affecting the Navy’s active-duty force. The 2003 NPS addresses several major areas of Sailor life, including general demographics, satisfaction with leadership, Sailor financial status, detailing, TEMPO (i.e., time spent away from home), job characteristics, job satisfaction, career development and intentions, morale, organizational commitment, gender integration, and overall satisfaction with Navy life.

Methods

Approach to Sampling and Weighting

The 2003 Navy-wide Personnel Survey (NPS) was distributed to a stratified random sample of 13,960 active-duty officers and enlisted Sailors in the beginning of December 2002 (for a copy of the survey and other contact materials, see Appendix A). Completed questionnaires were accepted through May 5, 2003.

The sample for the survey was drawn during October 2002 from a sampling frame ($n = 341,046$). The sampling frame represented a total of 90 percent of the available active-duty personnel in the Navy during the last quarter of the calendar year 2002. This sample represents individuals in the Navy, in stable locations who were accessible for data collection. The sampling represented approximately 3 percent of the total enlisted population and 6 percent of the total officer population (see Table B-1). Reminder letters were mailed to the entire sample in January 2003, approximately six weeks after the surveys were distributed. A total of 3,471 useable surveys were returned, resulting in an adjusted return rate of 28 percent (see Appendix B). Of the surveys returned, 66 percent were completed on paper and 33 percent were completed over the Internet.

Sailors with a paygrade of E-1 were excluded from the sample due to the fact that this designation is typically only used when Sailors are in their basic training at the Naval Recruit Training Center Great Lakes. Their lack of experience regarding Navy personnel issues and the difficulty in reaching adequate numbers of these most junior Sailors were the reasons for this exclusion. This exclusion of E-1s is typical of other large-scale Navy-wide personnel surveys.

Sailors were sampled randomly in proportion to the size of their group within the population for each level of paygrade (E-2 to E-3, E-4 to E-6, E-7 to E-9, W-2 to W-4, O-1 to O-3, and O-4 to O-7), gender (male, female), and minority status (White, Black, Other; see Table B-2). The sample was drawn taking into account previous response rates, desired margin of error, and shared characteristics across the sample subgroups to arrive at an optimized sample using the Sample Planning Tool (Kavee & Mason, 2001).

To ensure that the survey results accurately reflect the opinions of Sailors throughout the Navy, the data were weighted to be reflective of the larger Navy population. Weighting is commonly used in professional survey research and practice as a means of increasing the accuracy of estimates of target population attitudes and opinions by adjusting the overall proportions to match known population characteristics. Some categories with smaller populations are overrepresented in the sample, while others are underrepresented. Weighting adjusts for these fluctuations in the sample so that the weighted sample accurately estimates the views of the entire Navy population as well as key demographic subgroups. (e.g, officer-enlisted; male-female) Additional consideration in weighting the responses was given to the differential response rate by paygrades (i.e., juniors typically have lower response rates than more senior Sailors do).

The characteristics used in weighting included paygrade, minority status, and gender. This combination of variables created a total of 36 weight classes (see Table B-2). Weights were calculated using the product of a base weight formula and a non-response weight formula. The base weight formula consists of dividing the total number of units within the strata of the population frame by the number of units sampled from the same strata. The non-response weight formula consists of the number of units sampled from the strata in the population frame divided by the number of valid returned surveys within the same strata. For example, if 29,257 individuals exist in the sampling frame for the strata consisting of E-2 to E-3, male, white Sailors, and 1,875 individuals are sampled from that strata, the base weight is $29,257/1,875 = 15.604$. If only 91 valid surveys are returned for that strata, the non-response weight is $1,875/91 = 20.604$. The product of the base weight and non-response weight provides the combined weight for use in weighting the sample: $15.604 * 20.604 = 321.505$. As a check, the combined weight (321.505) multiplied by the number of returned valid surveys (91), should provide the correct total sample frame number (29,257). The combined weights were entered into the survey data file and applied to all analyses using the WEIGHT function in SPSS version 10.

How to Read Statistical Tables

The information contained in each statistical table is described in Figure 1. The key provided below provides further clarification:

1. Title of table (survey question by demographic group)
2. Survey question
3. Category of question response options
4. Demographic group by which responses are reported
5. Cell frequency
6. Percentage of column respondents selecting question option
7. Column total
8. Total number of respondents selecting that question option
9. Percentage of total respondents selecting that question option
10. Total number of responses for survey question

Note: The weighting procedure followed, of rounding to whole numbers, may sometimes produce a zero frequency combined with a non-zero percentage for a cell. For all practical purposes, such results may be ignored.

Figure 1. Statistical table for Question 66A "I have adequate access to college/graduate education at my command" according to officer paygrade.

Organization of Report

The sequence of statistical tables in this report corresponds to the sequence of questions in the 2003 NPS. Results for officers and enlisted Sailors are presented in the CD that accompanies this report. Questions were broken out by paygrade, race, gender, and in some instances, billet (i.e., Navy job).

Appendix A contains copies of the 2003 NPS survey cover letter and the survey instrument, as well as the pre-notification and reminder postcards. The sequence of each of these documents is provided above in the section titled "Approach."

Appendix B contains a description of the sampling and weighting procedures used in the survey. A discussion of the sampling and weighting methods as well as look-up tables are provided for the reader explaining the procedures in more detail.

Appendix C contains the Officer tables and Appendix D contains the Enlisted Tables.

Dear <Rank> <Last>,

Have you ever wished that you could tell senior leadership about both the good and bad that you have experienced in Navy work life? If so, the 2002 Navy-wide Personnel Survey (NPS) is your opportunity to do just that.

The 2002 NPS is sponsored by the Chief of Naval Personnel (CNP), and is used by the CNP and other senior leaders to gain further insight into the state of Navy work life. Results from previous surveys have supported increases in pay (and benefits), improvements to the detailing process, and support for an overhaul of the present advancement/promotion system.

The success of this survey depends on you. You were randomly selected by computer to participate in the 2002 NPS. Participation in the survey is voluntary, however, it is strongly encouraged that you take part in the survey to ensure an accurate portrayal of Navy work life. If you choose to respond, you can be assured that your responses will be confidential and safely protected.

You will be receiving a survey packet from us in the next few weeks, which will contain the paper survey and instructions on completing the survey via the web, if you prefer. We hope you will take part in this important survey. *Your responses will help our leaders make positive changes today and shape the Navy of the future.*

The NPS is being conducted by the Institute for Organizational Assessment (PERS-14), at the Navy Personnel Research, Studies, and Technology Department (NPRST) in Millington, TN. Feel free to contact us, if you have any questions about this survey. Thank you.

Sincerely,

Murrey Olmsted
Project Director

Dear <Rank> <Last>,

Recently you were sent a copy of the *2002 Navy-wide Personnel Survey (NPS)*, however, we have not yet heard back from you. Collection of surveys will soon end, and we wanted to give you a final invitation to participate in this important survey. If you have already completed the survey, we thank you for your participation. However, if you have not yet returned the survey, we encourage you to do so.

The *2002 NPS* is a great opportunity for you to tell senior leadership about both the good and bad that you have experienced in Navy work life. The *2002 NPS* is being sponsored by the Chief of Naval Personnel (CNP), and is designed to collect information from Sailors on issues related to work life, career development, and career decisions. Results from previous *NPS* surveys have been used to support increases in pay (and benefits), improvements to the detailing process, and support for an overhaul of the present advancement/promotion system.

Participation in the survey is voluntary, however, it is strongly encouraged that you take part in the survey to ensure an accurate portrayal of Navy work life. *Your responses will help our leaders make positive changes today and shape the Navy of the future.* Please complete either the paper survey that we sent you or the survey on the Internet (<http://www.nprst.navy.mil/nps2002>).

Feel free to contact us, if you have any questions or concerns about this survey. Thank you.

Sincerely,

Murrey Olmsted
Project Director

Kimberly Whittam
Co-Investigator

<City> <State> <Zip>

Dear <Rank> <Last>,

Have you ever wished you could tell senior leadership about your experiences with Navy work life? The *2002 Navy-wide Personnel Survey (NPS)* is your opportunity to give us that feedback.

In the last *NPS* (2000), you told us your concerns about many different issues. As a result, survey findings were used to support a number of initiatives including:

- The largest pay increase in the past 10 years (FY 2001/2002);
- Implementation of a plan to raise BAH to 100% coverage (by FY 2005);
- Renewed focus on increasing funding for needed parts and supplies;
- Efforts to overhaul the current Navy advancement/promotion system;
- Widespread changes in detailing to improve efficiency and service.

Your copy of the *2002 Navy-wide Personnel Survey* is enclosed. You were randomly selected to receive this survey, as a representative Sailor of the United States Navy. ***Your participation is very important to the success of this survey.*** Since not every Sailor will receive a questionnaire, your responses represent not only your views, but those of others as well. I want to assure you that your responses will be confidential and safely protected. I am asking for your full support of this survey to ensure an accurate and reliable picture of Navy work life.

This year, you have a choice of how to complete the survey. You can either complete the enclosed survey (and return it in the envelope provided) or you can take the survey on the Internet at www.nprst.navy.mil/nps2002. The attached sheet contains additional instructions and information on completing the Internet-based survey. This survey should take approximately 30 minutes of your time to complete.

The *2002 NPS* is being conducted by the Navy Personnel Research, Studies, and Technology Department (NPRST), in Millington, TN. If you have any questions about this survey, my point of contact is Murrey Olmsted; he can be reached at (901) 874-2130, (DSN) 882-2130, or Murrey.Olmsted@persnet.navy.mil.

Thank you for taking time to provide ***valuable*** feedback and improve ***our*** Navy.

Sincerely,

Vice Admiral, U.S. Navy
Chief of Naval Personnel

Gerald L. Hoewing
